

THE OPERATIONS MANAGEMENT PLATFORM

Overcome critical industry challenges with a centralized and real-time solution to manage, scale, and empower your most valuable resource - the people. Give your frontline teams the tools to execute with precision, no matter the skill level. Enhance clarity with your customers by providing a single source of real-time operations activity. With Chekhub, combine and centralize your asset management & maintenance, workforce management, digital checklists, training, ticketing, dispatch and scheduling all in one easy-to-use platform.

Stakeholders and specialists create and collaborate on digital checklists for SOPs, MOPs, and specific procedures directly in Chekhub. Technicians interact with step-by-step instructions to ensure operational success, while management teams gain visibility into their locations and progress on the job.

To gain performance metrics and operational success, Chekhub connects all aspects of your operations by allowing you to communicate the essentials every time:

1. **Who** - Assign the right person, team, or vendor based on qualifications and location.
2. **What** - Provide a digital checklist for the technician to follow step by step per ticket.
3. **Where** - Attach the specific asset which includes the location for GPS directions.
4. **When** - Set the due date and time frame, or even a recurring schedule.

OPTIMIZE YOUR OPERATIONS WITH CHEKHUB:

- Reduce Human Error
- Collaborate with stakeholders in a single platform
- Real-time visibility of field work
- Increase clarity around scope of work
- Standardize processes and procedures
- Train and Upskill with In-The-Job Training™ (IJT)

5,000+

CLARITY

ASSET & MAINTENANCE MANAGEMENT

- Create configurable templates of asset attributes.
- Gain full lifecycle management of all assets.
- Set notifications and reports on missed or overdue maintenance.

CUSTOMER ENGAGEMENT & ALIGNMENT

- Provide real-time dashboard for customer visibility.
- Ensuring alignment from scope to job completion.
- Collaborate with customers when creating procedures.

EFFICIENCY

TICKETING, SCHEDULING & DISPATCH

- Multi-level approval workflow for work order assignment and completion.
- Track all events and SLA's against assets, technicians, customers, and locations.
- Automate routine maintenance schedules per asset.

WORKFORCE MANAGEMENT & PERFORMANCE

- Manage internal, vendor, and subcontractor teams.
- Log & track performance by individual, team, or vendor.
- Use performance data to improve processes and procedures.

PRECISION

DIGITAL MOPS, SOPs, & PROCEDURES

- Techs can interact & complete each step via mobile app.
- Add alerts and controls to ensure successful completion.
- Create configurable checklists for precise instruction.

TRAINING & QUALIFICATIONS MANAGEMENT

- Add instruction videos & images for In-the-Job Training™ (IJT).
- Ensure work is dispatched to properly qualified technicians.
- Add qualifications per employee and vendor.

CLARITY. PRECISION. EFFICIENCY.
